Dear Hiring Manager,

I am writing to express my interest in the Prompt Engineering Specialist position at Novartis, as advertised. With a Master's in Statistics, hands-on experience in data science and prompt engineering, I am confident that I possess the requisite skills and expertise to excel in this role.

In my current role as a Data Scientist at Cognizant Technology Solutions, I have spearheaded the development and implementation of Generative AI models with a focus on prompt engineering. By collaborating with cross-functional teams, I have been successful in translating complex project objectives and requirements into effective, data-driven solutions. I have also taken the initiative to monitor AI model performance and troubleshoot issues, ensuring optimal system functionality and efficiency. Furthermore, I have documented all processes and adjustments, providing prompt support when needed, and conducted training for team members on Generative AI technologies and methodologies.

During my internship as a Data Analyst at CSIR- Central Leather Research Institute, I gained valuable experience in conducting in-depth time series analyses and implementing linear regression models. This experience, coupled with my strong academic background, has equipped me with a solid understanding of data preprocessing, cleaning, and validation processes, and the ability to present predictive model findings to leadership teams.

My proficiency in Python, SAS, R, and SPSS, coupled with my understanding of SQL databases and Azure cloud services, further complements my data science capabilities. I am also a certified professional in several relevant courses, including GEN AI Fundamentals and Career Essentials in Generative AI.

I am excited about the opportunity to bring my unique blend of skills and experience to Novartis, a company I have long admired for its commitment to innovation and excellence. I am confident that I can contribute to the ongoing success of your team and would welcome the opportunity to further discuss my suitability for this position.

Thank you for considering my application. I look forward to the possibility of working with you.

Sincerely,

*Anisha J*
